

Penta eSign

Fast, Secure Digital Signatures

Ultra Secure Signature and Authentication

Penta eSign represents the **highest possible level of security** for your document-signing processes, done your way.

Integrity and **confidentiality** are guaranteed, thanks to the advanced encryption methods that authenticate and secure your documents and signatures.

How It Works

State-of-the-art, advanced encryption protocols protect your documents.

Two-factor authentication (2FA) adds an extra layer of security to the signing process.

The Benefits

- ☆ Quicker client contract signature turnaround
- ☆ Private cloud with full control over your documents and backups — no uploading to any other company or country
- ☆ Clear data jurisdiction — data is hosted solely at Penta's data centres, which are in Switzerland and Dubai. You can choose which of the two is more suitable for your business and compliance needs. This means there's no data leak to other jurisdictions (i.e. backups). It also means all contracts are signed with independent local companies, under either Swiss or DIFC jurisdiction. There is absolutely no exposure to other countries, either through data location or company registration.
- ☆ Your clients see your website, domain and brand throughout the process, not ours — instil trust in your company and operations
- ☆ Clear, affordable pricing — no pay-per-document structure

This is digital signing designed to meet your exact business needs. Penta eSign offers extensive customisation options, for a seamless, branded signing experience.

CUSTOM WORKFLOWS:

Design signing workflows that fit your unique business processes.

BRANDED INTERFACE:

Personalise the signing portal with your company's colours, logo, and branding.

CUSTOM DOMAIN MAPPING

Map a custom domain name to your digital signature portal. With Penta eSign you can quickly and easily integrate your existing domain, to provide a cohesive, seamless experience for your clients.

CUSTOM DOMAIN INTEGRATION:

Use your existing domain for the signing portal.

SEAMLESS BRANDING:

Maintain consistency with your brand identity.

Enjoy all the Security and Reliability of our Private Cloud

Penta eSign is hosted in our private data centres. This guarantees maximum data protection and complete compliance with industry standards — no matter where you are in the world.

PRIVATE CLOUD HOSTING:

Secure and compliant hosting in Penta's data centres.

DATA SOVEREIGNTY:

Safeguard your data within protected jurisdictions.

Who is this for?

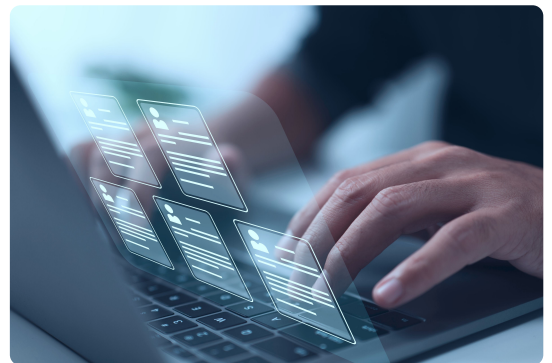

Everyone, but particularly sensitive industries, where stringent security and compliance requirements are both mandatory and imperative.

These include (but are by no means limited to):

Finance

Healthcare

Legal services
